**Flaig + Hommel**

# Flaig + Hommel machining: Precision with Personality!

Small- and medium batch production of turned and milled parts is a strategically important department of the company Flaig + Hommel; one which we, since the take-over of the Weiss GmbH in 1997, work and expand with great enthusiasm.

Our competent team, consisting of approximately 10 machining specialists, offers the kind of values and support usually only known from large-volume productions.

Intensive advice from the early stages of the development process of your products, individual project monitoring and highest quality without compromise are our key factors for your success.

Continuous investment in our manufacturing plant and the professional qualifications of our employees guarantee a reliable and efficient partnership - now and in future.

Within the sector of machining, we offer the following services:

- Milled parts made from aluminium
- Milled parts made from stainless- and specialist steel
- Turned parts up to 65 mm in diameter
- Job order production and finishing

## QUALITY

Quality is at the root of our success. New, state-of-the-art, testing facilities and the personal involvement of our employees offer you the reliability you expect for your precision parts.

Depending on durability requirements and specifications, we have the whole range of heat treatment and surface refinements at our disposal.

## PROTOTYPING

Dimensioned for the manufacture of small and medium batch sizes, our machinery offers optimum conditions for the development and production of prototypes and pilot series.

## BATCH PRODUCTION

Flexibility, speed and the meeting of agreed delivery dates are vital for the batch production and a matter of course for us. Hereby, excellent value for money always takes centre stage.

Our efficiency in the manufacturing of high-precision solutions for complete assembly groups is appreciated by a steadily growing customer base.

## THE FLAIG + HOMMEL GROUP

The company Flaig + Hommel has been founded in 1946 by Christian Flaig. Mr Flaig guided the company with strategic foresight and a keen sense of growth markets to become today's effective manufacturer of innovative system-solutions for the fastening industry and specialist machining solutions.

Flaig + Hommel employs 200 qualified members of staff at its production site in Aldingen.

A state-of-the-art manufacturing plant, a new logistics centre with a fully automated high rack storage area, and groundbreaking innovations, such as the FS All-Steel Lock-Nut, mark Flaig + Hommel's dynamic, future-orientated conduct.
